

**Below is a list of products and their compatibility:**

(all products not listed, as well as new/upcoming products, will be fully compatible with Total Control 2.0)

URC will be offering an UPGRADE program for our direct dealers that wish to convert their systems to Total Control 2.0. Please speak with your local URC Sales Team for more details about this upcoming program.

The new Accelerator 2.0 software will not be compatible with all existing base stations. Due to the nature of this upgrade and the configuration change to memory and processor, some of our older base stations and user interfaces will not work.

**Compatible Products**

MRX-8

MRX-10

Models with serial numbers **higher** than  
IC1907140008474

MRX-20\*

TRC-1280\*
